

Hà Đức Hạnh

Date of birth: April-19-2000

Phone: 0336473325

Email: zhaduchanhzz@gmail.com

Address: Dong Da, Ha Noi

LinkedIn: linkedin.com/in/ha-duc-hanh-185077245

OBJECTIVE

Take advantages of code skills & experience and understanding of software to become a professional staff and bring a lot value to Customers. From that, I will contribute to development of Company.

EDUCATION

FPT University

Oct 2018 - Oct 2023

Major: Software Engineering

1. Narrow specialization : Information system
Graduation : Graduated

WORK EXPERIENCE

Mobino Company

Apr 2025 - Present

Backend Developer

Onsite Backend Developer (Viettel hightech): Worked onsite at a partner organization to develop and enhance a large-scale C4I platform. Collaborated closely with external teams to integrate backend services, implement new features, and ensure security, stability, and interoperability in a mission-critical environment.

TP Bank

Jan 2025 - March 2025

Backend Developer

Participate in building maintenance projects, upgrading e-wallet system products and services, connecting partners to exchange information to integrate into the partnerX project.

VNPT - IT

August 2023 - December 2024

Backend Developer

Participate in maintenance projects, upgrade products and services of VNPT-IT's Dynamic Reporting system, develop feature of Dynamic Reporting project and iGate one gate service.

Fresher From Fsoft Academy

May 2022 - Sep 2022

On Job Training

Learned fresher course from Fsoft Academy to enhance ability with Java Programing. with Book e-commerce .

Game Publisher

July 2020 - Oct 2021

Game Designer & Developer

Private game publishing game with teammate, Team size 3 people
Creating event for player., orientation game play, response game player question
Support resolve problem from player.(support running game environment)
Programing with scripting language (Lua 4.0 script).

PROJECTS

Viet Nam C4i
(01/2025 - Present)

Customer	Viettel High Tech, Viet Nam Ministry of Defence
Description	A nationwide C4I system for the Vietnam People's Army is a mission-critical platform integrating Command, Control, Communications, and Intelligence across all services and command levels. The backend focuses on distributed, highly available services that ingest, correlate, and fuse real-time data from ISR, sensors, GIS, and operational reports to support situational awareness and command decisions. The system is built for high security, resilience in degraded networks, and interoperability with both legacy and next-generation military systems.
Team size	8
My position	Backend Developer
My responsibilities	- Maintain and operate backend systems to ensure stability, high availability, and performance of a large-scale C4I platform. - Design and implement integrations between newly developed systems and existing/legacy subsystems via APIs and message-based architectures. - Develop new backend features based on research and operational requirements, translating studied scenarios into scalable services and data-processing workflows. - Ensure security and data integrity, including access control, auditing, and secure data exchange across systems. - Collaborate in deployment, testing, and system evolution, support
Technologies used	Java, Spring Boot, Oracle, K8s, OnlyOffice, Quarkus, Web Socket, gRPC

E Signature
(01/2025 - Present)

Customer	Customer of Mobino company
Description	Digital Document Signing System: Developed a secure system for digitally signing PDF documents using HSM (Hardware Security Module), ensuring legal validity, data integrity, and non-repudiation. The backend handles document hashing, signature generation via HSM, certificate management, and verification workflows, with a focus on security, performance, and compliance with digital signature standards.
Team size	1
My position	Backend Developer
My responsibilities	- Upgrade PDF signing stack by migrating iText from 5.5 to iText 7, refactoring legacy signing logic to align with the new API and architecture. - Migrate Java version from Java 8 to Java 21, resolving compatibility issues, deprecated APIs, and updating build configurations. Align cryptographic libraries by upgrading and configuring Bouncy Castle to be compatible with iText 7 adapters and HSM-based signing. - Ensure backward compatibility and signature validity, maintaining existing PDF signing workflows during the upgrade. Perform regression testing and performance validation to ensure secure, stab
Technologies used	Java, Spring Boot, iText

Partner X
(01/2025 - Present)

Customer	TP Bank User
Description	The product connects with service providers such as phone top-up, card code purchase, insurance purchase, etc. Partner services are integrated through the partner's web view, URL or mini app and payment at TP bank.

Team size	4
My position	Backend Developer
My responsibilities	- Collaborate with technical teams to design solutions that integrate partner services with the Bank, ensuring the proposed solution aligns with business strategy and objectives. - Develop and maintain specific requirements according to each partner's requirements - Manage, observe, trace logs, handle errors, and report errors from customers and testing teams. - Technical support when integrating services with partners.
Technologies used	Java, Spring Boot, Oracle, ELK, Kibana

Dynamic Report

(08/2023 - 12/2024)

Customer	VNPT- IT , VNPT Province
Description	Dynamic reporting is a product that provides flexible report creation and management services, flexible input data, flexible output report formats, and supports integration as a service in other systems.
Team size	3
My position	Backend Developer
My responsibilities	- Developed core backend render services with Java Spring Boot, focusing on scalability and performance. - Managed Postgres DB, Oracle database architecture and optimized queries for performance. - Collaborate with teams to expert workflows and improve user experience. - Integration this product to customer system.
Technologies used	Java, Spring Boot, .NET Framework, .NET core, Jasper Report, DevExpress Report, BIRT(Eclipse), Crystal Report, Docker, Oracle, PostgreSQL

IGATE 2.0

(11/2023 - 04/2024)

Customer	VNPT Province, Government
Description	I Gate is a project providing one-gate public administrative services and managing administrative procedure profile. Supports all administrative procedures and allows administrators to process, manage and keep statistics of procedures and records.
Team size	10
My position	Backend Developer
My responsibilities	- Developed core backend services with Java Spring Boot, optimal performance of Search Feature, Export large file feature - Integration Dynamic report product to this system.
Technologies used	Java, Spring Boot, Kafka, MongoDB, k8s, Docker

Education Quality Accreditations

(04/2023 - 08/2023)

Customer	FPT University
Description	The EQA product allows educational institutions to track and evaluate their improvement process over time. Managing educational quality assessment reports online also allows assessment teams to work remotely and increases transparency in the assessment process.

Team size	5
My position	Business Analyst
My responsibilities	- Requirement Gathering and Analysis, Document maker - Act as a liaison between stakeholders, Facilitate communication to ensure all parties understand project goals and constraints. - Collaborate with technical teams to design solutions that meet business needs, ensure the proposed solution aligns with business strategies and goals.
Technologies used	.NET Framework , CK editor, MySQL

CERTIFICATIONS

- Academic preparatory English FPT Certificate	2019
- Computer Communications by University of Colorado System	2021
- Google Project Management	2023
- Cert Nexus Certified Ethical Emerging Technologist	
- Cybersecurity Operations Fundamentals	2024

HONORS & AWARDS

Champion Speech choir competition Fall Semester 2019	Dec-17th-2019
Top 4 Solo King League Legend FPT ESport Club	August-2021

SKILLS

English:	Listen and reading skill.
Working Tools:	Jira, Microsoft Word, Excel.
Programing:	HTML , CSS, Java , Spring boot , .NET, Lua script , Git

INTERESTS

- Having a deep conversation to expert problem.
- Learn new things
- Soccer, reading
